SKILLS

Architecture & Design

- System Characterization & ERD
- AI Implementation & Prompt Engineering

Automation & API

- Make.com, Zapier
- WhatsApp API & Messaging
- Database Mapping

Data & Platforms

- Airtable, Zoho CRM
- Excel & Google Sheets

Core Attributes

- Rapid Technical Learning
- Independent Execution
- Critical Thinking

EDUCATION

The Hebrew University of Jerusalem

B.A. in Philosophy & Sociology,
Anthropology

2026 - present

LANGUAGE

- Hebrew (native)
- English (academic)

IMPACT PROJECTS

National Volunteer Network Management

Radical, "Iron Swords" War Effort

October 2023 - February 2024

- Goal: Establishing a rapid-response aid network to bridge the gap between civil needs and volunteer resources during a national crisis.
- Architecture: Designed a real-time matching infrastructure using Airtable and Make.com to orchestrate 10,000+ participants.
- Connectivity: Automated mass-communication and classification via WhatsApp API (Twilio/MessageBird), drastically reducing systemic response time.

Building & Customizing CRM Infrastructure

Radical - Ideas house

2022

- Goal: Scaling customer engagement and creating a data-driven foundation for long-term community retention.
- Architecture: End-to-end characterization and deployment of Zoho CRM; designed automated lifecycles and complex data segmentation to drive repeat purchases and engagement.

PROFESSIONAL EXPERIENCE

Operations & Infrastructure Lead

Radical - Ideas house

2021-2024

- Goal: Managing the operational backbone of a complex academic-cultural ecosystem to ensure seamless execution of large-scale events.
- Systems: Orchestrated 200+ events for tens of thousands of participants; managed distribution of 12,000 titles to 100 points of sale using data management systems and Excel logic.
- Leadership: Managed diverse teams and external vendors, translating organizational goals into efficient technical workflows and budget protocols.

Epidemiological Investigator & Teacher-Soldier

IDF

2020-2022

- Data Analysis (Alon HQ): Analyzed large-scale data patterns and performed contact tracing to cut infection chains under high-pressure conditions.
- Mentored youth-at-risk, overseeing end-to-end educational plans and preparing them for meaningful military service.
